

Why the fate of online accessibility may rest with a Domino's Pizza lawsuit

The pizza chain asked the Supreme Court to review a case that could push business websites to better serve people with disabilities.

FACT SHEET

- Over 2,000 federal lawsuits are filed each year over business websites which are not usable by people with disabilities.
- Requirements decided by the courts differ across the US.
- Other countries' laws may also apply.
- Web Content Accessibility Guidelines (WCAG) is an emerging industry standard ensuring compliance with the widest range of laws and jurisdictions.

\$490^{.00}/year

Compare

- Re-engineering efforts and maintenance cost \$5-\$50k/year and take weeks to months.
- Free plugin technology only covers 5%-15% of legal requirements.

LET ZEN DEN WEB DESIGN SECURE COMPLIANCE

We have partnered with the leading accessibility technology provider to provide an Artificial Intelligence driven monitoring and update solution.

- Initial scan and update of your website in 48 hours with no downtime.
- Daily scan to ensure new content is compliant.
- Fully WCAG 2.1 compliant
